ICE IPv4/IPv6 Dual Stack Fairness

draft-martinsen-mmusic-ice-dualstack-fairness-00

Nov 2014

IETF 91

Authors: Tirumaleswar Reddy, Prashanth Patil

Presenter : Pål-Erik Martinsen

What's New

- Renamed draft from ICE-Happy Eyeballs to IPv4/IPv6 ICE DualStack Fairness.

- Better description of what the draft is all about.

- Added IPv6 friendly text.

> Implementations are encouraged to prioritize IPv6 candidates by putting some of them first in the the intermingled checklist. This increases the chance of a IPv6 connectivity checks to complete first and be ready for nomination or usage.

Outstanding Issues

- Move algorithm description from appendix to main with text:

   "Implementations SHOULD use the algorithm in Section xxx,
   but MAY user their own following the guidelines in
   Section yyy to ensure interoperability"

- More?

Next steps?

- There is a milestone..
