AD review comment -

Section 2.2.8

Is this a placeholder that is meant to be removed? If so, it should get removed before IETF last call.

Section 2.1.3 & 2.1.4:

Nit: Shouldn't [#3](#) just be:

"Scheduled or ad hoc collection task."

Update

Ticket	Summary	Status	Owner	Type	Priority ▲	Milestone
#4	use-cases-07 - 4 - need security & privacy considerations	new	david.waltermire@nist.gov	defect	blocker	
#2	use-cases-07 - 2.1.3/2.1.4 - grammar nit	new	david.waltermire@nist.gov	defect	minor	
#3	use-cases-07 - 2.2.8 - consider removal	new	david.waltermire@nist.gov	defect	minor	

Pros

- WG can easily track open issues and progress against them
- Transparency for people not actively involved in draft authorship
- Editors can easily track issues for a particular draft
- Individuals can easily see issues for which they're responsible
- Individuals can add comments to existing tickets
- Tickets can be created on the fly during F2F/interim discussions to capture issues and action items
- Help avoid re-litigating issues after consensus is reached

Cons

- Additional overhead that must be managed
- Email spam – message sent to list every time ticket is created or modified
- Must associate every ticket with a specific draft – hard to track general WG issues
