

TRAM

**Single SOcket Dual Allocation with TURN
(SSODA)**

draft-martinsen-tram-ssoda-01

June 2014

IETF 90

Authors: Justin Uberti, Oleg Moskalenko, Pål-Erik Martinsen

Presenter : Pål-Erik Martinsen

History

- Started as a technical discussion on the TRAM list.
- Draft was written to capture the ideas.
- -01 version have two separate implementations.

Now What?

- Still some unresolved controversy regarding brittleness of solution.
- Current implementation does not define any new attributes, relies on client detection of old server behavior.
- Authors think current solution is OK.
- Incorporate text into TURNbis and let draft expire?
