

Considerations of Using Unique Local Addresses

(draft-ietf-v6ops-ula-usage-recommendations-04)

Bing Liu, Sheng Jiang

IETF 91@Honolulu, Nov 2014

Discussion in last IETF

- Main concerns
 - Language issues
 - RFC2119 key words issue (mostly regarding to “SHOULD” “MUST”)
- The new 04 version
 - Tom Taylor did a language check and revision through the whole document (Many thanks to Tom!)
 - The key words were cleared
 - Unless one “MUST” and one “MUST NOT” which are actually a quoting to [RFC7084]

Comments?
Ready for WGLC

Thank you!
