

draft-ietf-tcpm-newcwv

Gorry Fairhurst
Raffaello Secchi

IETF 92, Dallas

Changes from previous draft (-07 -09)

- Removed text on ECN interactions
- Removed “update” to RFC 5681 (downref)
- Editorial changes
- No changes to the method

Status of the document

- Intended status is “Experimental “ pending experience with deployed implementations
- No open issues
- Please comment during WGLC

The authors were part-funded by the European Community under its Seventh Framework Programme through the Reducing Internet Transport Latency (RITE) project (ICT-317700).

Status of NewCWRV implementations

- Updated kernel patch to Linux 3.18
 - Interoperable with other CC schemes
 - Provides a switch to modify current Linux TCP behaviour
- Patch for Free BSD under review
- Authors would love to have feedback from people who use or have experiences to share.
