

draft-ietf-ecrit- additional-data-32

IETF 93 ecrit WG — 20 July 2015
slides v1

Purpose of draft

- Establishes a mechanism for transferring related data with an emergency call
- A general mechanism for transferring specific, registered and identified blocks of data, each as a MIME body part or HTTPS
- Creates a set of such blocks to accommodate expected emergency call usage

Recent Changes

- XML examples verified against schemas
- Many bug fixes and clarifications
- Addressed Alissa's, Keith's, and Matt's comments
- Please review! -- It's much appreciated 😊
- Further reviews always helpful

Draft Status

- IETF Last Call requested
