

draft-ietf-ecrit-ecall-03

IETF 93 ecrit WG — July 2015
slides v1

Purpose of draft (1)

- Shows how to re-use other IETF mechanisms to enable next generation (all-IP) pan-European eCall
- eCall is a standardized vehicle emergency call system providing voice and vehicle data (called Minimum Set of Data or MSD) mandated in the European Union

Purpose of Draft (2)

- Describes how the pan-European eCall service can be supported using IETF standards (adhering to European Commission requirements and regulations)
- Required by ETSI report on eCall migration: "ETSI Mobile Standards Group (MSG); eCall for VoIP", TR 103 140 4/2014
- Anticipated requirements by 3GPP eCall work

Draft Status

- Clarifications and bug-fixes
- Added better examples
- Fleshed out schema
- Validated examples against schema
