

# Use Cases and Operational Experience with Multipath TCP

Olivier Bonaventure

Christoph Paasch

Gregory Detal

IETF93, July 2015, Prague

# Updates to the draft since LC

- Covers use cases and operational experience
  - Mainly based on the Linux implementation
  - Updated title
- Use cases
  - Moved to section 2 with clearer structure
  - Datacenters, WiFi/cellular offload, MPTCP proxies
- Operational experience
  - Text restructuring and clarifications
  - Some more text on middlebox interferences

# Next steps

- This draft is part of our charter and we should finalise it to finish our objectives
