IETF 94 CCAMP November 2015 Yokohama
Updates from -02 version

- Changes the title to better align with RFC6003
  - Old: "RSVP-TE Signaling Extension for Links with Variable Discrete Bandwidth"
  - New: "Ethernet Traffic Parameters with Availability Information".

- Add some clarification text in Section 3.3
  - If all <bandwidth, availability> requirements can be satisfied (the requested bandwidth under each availability parameter is smaller than or equal to the remaining bandwidth under the corresponding availability parameter on its local link)

- Editorial changes through the text
  - Remove the normative language in the informative sections
  - Reference list update
  - “PE node” -> “node”
Next steps

• The authors believe the draft is stable
• Would like to ask for WG LC
