Link Management Protocol Extensions for Grid Property Negotiation
draft-ietf-ccamp-grid-property-lmp-02

Qilei Wang, ZTE
Guoying Zhang,　CATR
Yao Li, Nanjing University
Ramon Casellas, CTTC
Yu Wang, CATR

Comparison with 01 version

- Minor changes:
  - adding some clarification to indicate the properties negotiated belong to interface, not the node. For example, paragraph 4, section 5.1

    "As the channel spacing and slot width of node B can be configured to be any integral multiples of 6.25 GHz and 12.5 GHz respectively,"

    has been changed to:

    "As the channel spacing and slot width of the corresponding interface of node B can be configured to be any integral multiples of 6.25 GHz and 12.5 GHz respectively,"

Comparison with 01 version

- Minor changes:
- clarification in chapter 5.2 about the protocol interactive process, which explicitly tells that the mismatch situation arises.

- change of one author due to the personnel alteration.
