

CLUE Signaling

Rob Hansen

IETF 94

Since IETF 93 (1)

- Version -06 produced and put into WGLC
 - Made consistent with data model and protocol documents
 - Terminology matches framework
 - DTLS mandatory to implement but no longer mandatory to use, ‘security’ mandatory to use, but no longer defined as SRTP.
 - Limited syntax of H264 encoding on sendonly m-lines removed as an open issue

Since IETF 93 (2)

- WGLC reviews closed 21st Oct
 - Reviews received from Christian, Paul & Mark
 - No major issues identified
 - Most comments editorial in nature
 - However, some sections need additional information or consideration
 - Order of messages in example call flow needs revising

Next action

- Can anyone who is still in the process of/planning to do a review indicate now?
- Will produce revised version taking reviews into account
 - Unless anyone indicates an incoming review, will do so by the end of the month
- Should then be ready for next stage
