

# draft-ietf-dmm-4283mnids

Charlie Perkins

IETF94 Yokohama  
2nd November 2015

# Overview

- Recent changes
- Issues raised

# Recent changes

- Added explanation for relevance to Mobile IP.
- Clarified meaning of EPC [not the LTE core network!].
- Added new table for Mobile Node Identifier Description in section 2 with better description of each type of MNID.
- Editorial improvements to Security Considerations; suggest use of IPsec.

# Recent issues raised

- Need for new subsection containing textual description for each MNID

# Next Steps

- Make sure issue resolutions are satisfactory
- Compose text for each MNID if required
