dnsssd WG

IETF 94
Yokohama, JP
November 2, 2015
Note Well

Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:

- The IETF plenary session
- The IESG, or any member thereof on behalf of the IESG
- Any IETF mailing list, including the IETF list itself, any working group or design team list, or any other list functioning under IETF auspices
- Any IETF working group or portion thereof
- Any Birds of a Feather (BOF) session
- The IAB or any member thereof on behalf of the IAB
- The RFC Editor or the Internet-Drafts function

All IETF Contributions are subject to the rules of RFC 5378 and RFC 3979 (updated by RFC 4879). Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice. Please consult FC 5378 and RFC 3979 for details.

A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.

A participant in any IETF activity acknowledges that written, audio and video records of meetings may be made and may be available to the public.

Document Status

• draft-ietf-dnssd-hybrid-01
  – Will consider for WG last call today
  – Does this document meet the requirements of RFC 7558?
  – Looking for document shepherd

• draft-ietf-dnssd-push-02
  – Needs review against dnssd-hybrid specification
  – Will consider for WG last call today
  – Looking for document shepherd

• draft-ietf-dnssd-mdns-dns-interop-02
  – WG last call complete 2015/07; comments discussed at IETF-93
  – Rev -02 published includes updates from WG last call comments
  – Needs final review by WG before forwarding to IESG
  – Looking for document shepherd
Next steps

• Three documents (likely) ready for IESG
  – draft-ietf-dnssd-hybrid-01
  – draft-ietf-dnssd-push-02
  – draft-ietf-dnssd-mdns-dns-interop-02

• Is there anything else required to meet requirements for “extended, scalable DNS-SD”

• Are there issues from draft-ietf-dnssd-mdns-dns-interop-02 that we need to send to dnsop WG?
