

Passive Aggressive

It's OK if we don't get consensus; I'll just do it anyway

Review of what it is

1. Clarifying the 5245 text that says "you can send media before a candidate pair is nominated"
2. "Deprecate" aggressive nomination
 - a. SHOULD NOT send (explain why not, and under what few situations it might make sense)
 - b. MUST be able to receive

Implementation experience in Chrome

Chrome implementation

- Receive media on any candidate pair, regardless of if it's nominated or not
 - Which fixed a fun bug :)
- Send media before a candidate pair is nominated, if no other working candidate pair is nominated (working > nominated)
- In other words, fully ready to be passive aggressive.
- Still nominating aggressively, though.
