

Status Update

draft-ietf-lisp-lcaf-11

*LISP Working Group - Yokohama IETF
October 2015*

Dino Farinacci & Luigi Iannone

draft-ietf-lisp-lcaf-10

- Updated in **Jun 2015** presented in Prague in **Jul 2015**
- Discussion ensued at mic
 - Desire for better readability
 - Request for more specific use-case detail

draft-ietf-lisp-lcaf-11

- Updated in **Sep 2015** and presenting now
- Break up section “*LISP Canonical Address Applications*”
 - LCAF types referenced by RFCs and IDs are kept in this section
 - Non-referenced LCAF types moved to a new section “*Experimental LISP Canonical Address Applications*”
- Add a “*Use-Case*” paragraph to each section describing what the use-case is for the LCAF type and how it is used
- Received agreement from commenters

What's Next

- Get LISP LCAF registry formed
