
JSON Encoding of Data Modeled with YANG

`draft-ietf-netmod-yang-json-06`

Ladislav Lhotka
⟨lhotka@nic.cz⟩

4 November 2015

Changes since -04

- No changes to the encoding rules.
- New section describing the properties of the JSON encoding.
- Improved specification for the encoding of *anydata* instances.

Current Status

Two WG Last Calls – 3 reviews. All issues have been resolved.

Several implementations: RESTCONF, OpenDaylight, pyang.

The document is ready for publication.

Dependencies:

- upstream: RFC 6020bis,
- downstream: RESTCONF.
