

Network Access Control List (ACL) YANG Data Model

draft-ietf-netmod-acl-model-05

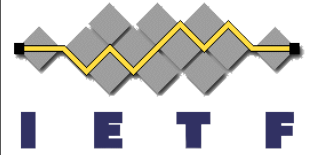

Authors:

Lisa Huang, Kiran Sreenivasa, Dana Blair,
Dean Bogdanovic (Ed.)

Topics

- Changes since -03
- Open issues

Changes

- Expanded key in list acl with acl-type
 - Before only acl-name now:
 - key “acl-type acl-name”
- Separated IP ACL identity into two, version specific
 - ipv4-acl and ipv6-acl
- Corrected ACL example XML
- Added new example how to augment model with mixed ACL types

Open issues

- Time-range
 - Should it be separate draft or should it be defined in each YANG model?
 - If defined in ACL model, request to add if-feature as not all vendors support time-range ACLs
