

Special session
on
**Managing Networks of Adaptive and
Cooperative Agents**

38th NMRG meeting
IETF94 – Yokohama
Session chair: [Laurent Ciavaglia](#)

Open Discussion

Towards smarter, more powerful network operations

- New (autonomic) functionalities?
- Human in the loop, reliability, trust?
- (vertical) Integration? Agent \leftrightarrow Node, Operator \leftrightarrow Agent
- Application domains? 5G, IoT
- First areas in need for standards?

Next steps...

- Publish a short report on outcome of the meeting
- Follow-up workshop at IETF95?
- Document problem space, use cases...
- Develop link with other research/working groups, other organizations...
- Develop link with other communities (e.g. AI, cybernetics...)
