OAuth 2.0 Device Flow

https://tools.ietf.org/html/draft-denniss-oauth-device-flow
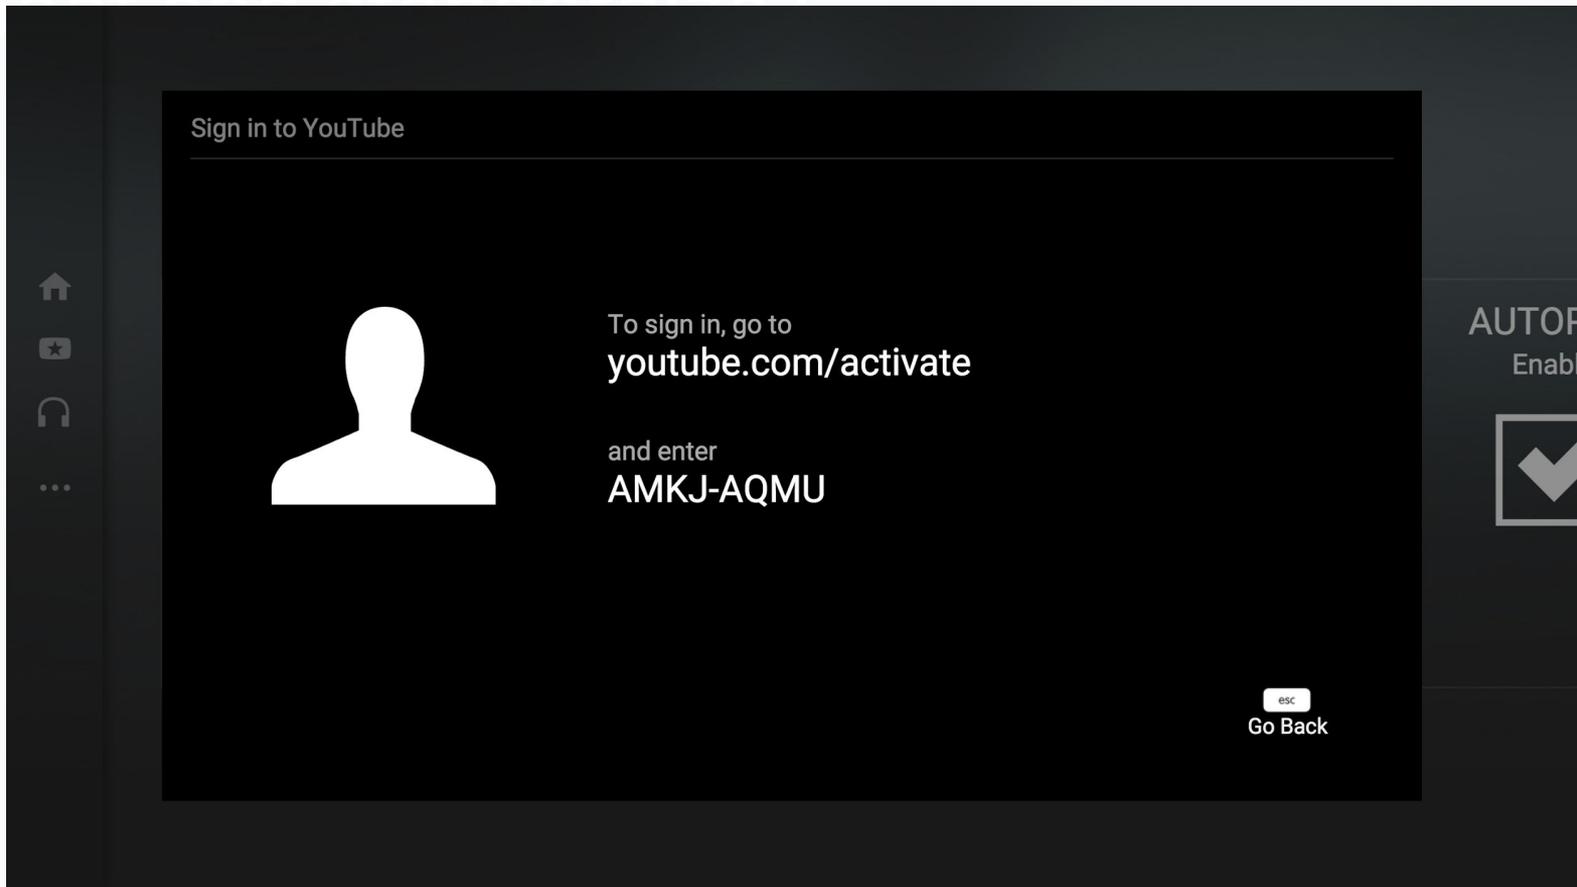

A second screen OAuth flow for limited-input devices like TVs.

Was in removed from OAuth in draft 07, and moved to a separate draft where it withered.

But… several people implemented it, including:

- Google: https://developers.google.com/identity/protocols/OAuth2ForDevices

- Facebook: https://developers.facebook.com/docs/facebook-login/for-devices

Device Flow in action on YouTube TV

Reboot and standardize?

Rebooted draft: https://tools.ietf.org/html/draft-denniss-oauth-device-flow
