Note Well

- Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:
  - The IETF plenary session
  - The IESG, or any member thereof on behalf of the IESG
  - Any IETF mailing list, including the IETF list itself, any working group or design team list, or any other list functioning under IETF auspices
  - Any IETF working group or portion thereof
  - Any Birds of a Feather (BOF) session
  - The IAB or any member thereof on behalf of the IAB
  - the RFC Editor or the Internet-Drafts function
- All IETF Contributions are subject to the rules of RFC 5378 and RFC 3979 (updated by RFC 4879).
  - Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice.
  - Please consult RFC 5378 and RFC 3979 for details.
  - A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.
  - A participant in any IETF activity acknowledges that written, audio and video records of meetings may be made and may be available to the public.

Intellectual Property

- When starting a presentation you MUST say if:
  - There is IPR associated with your draft
- When asking questions or commenting on a draft:
  - You MUST disclose any IPR you know of relating to the technology under discussion
- References
  - RFC 5378 and RFC 3979 (updated by RFC 4879)
  - "Note well" text

A Reminder

- This session has remote participants (and presenters!)

- For the minutes, note takers need to keep track of who said what.

- To work well, this requires that those in the room (and across the world!) be able to hear what you are saying.

- When speaking, please use the microphone (and state your name and affiliation).

  - draft-gellens-slim-negotiating-human-language
  - draft-tomkinson-slim-multilangcontent

SLIM WG Charter (Approved!)

- Full text: http://tools.ietf.org/wg/slim/charters
- Two specific use cases:
  - Email where different recipients require different languages.
  - Real-time communication where one party wishes to accommodate people with varying language and media needs.
- The group's initial focus will not be on supporting language-based call routing decisions.
- Goals and Milestones:
  - Mar 2016: Submit "Multiple Language Content Type" to the IESG
  - Mar 2016: Submit "Negotiating Human Language in Real-Time Communications" to the IESG

Not in the SLIM WG Charter

- A document covering security/privacy issues arising from inclusion of human language (and other personal information) within SIP/SDP.

- This document can be AD-sponsored (assuming authors can be solicited to write it).

- Brian Rosen (and others) have pointed out that the security/privacy conditions are fairly well understood.
