directed

Next Steps

- WG needs to decide if want to progress or not – need input (more than just a few individuals to determine consensus).
- Variety of next steps:
 - No one does anything: document dies
 - Document gets submitted as Independent Submission (IS)
 - Consensus emerges to accept IPR and progress.
 - IPR Holders change their licensing so that the WG feels acceptable for advancement.
 - Document is edited to remove the IPR-impacted technology portions.
- FYI: an individual can appeal the WG Chairs' decision not to progress.
