

PCEP Extensions for Establishing Relationships Between Sets of LSPs and Virtual Networks

<https://datatracker.ietf.org/doc/draft-leedhody-pce-vn-association>

Young Lee (Huawei)

Dhruv Dhody (Huawei)

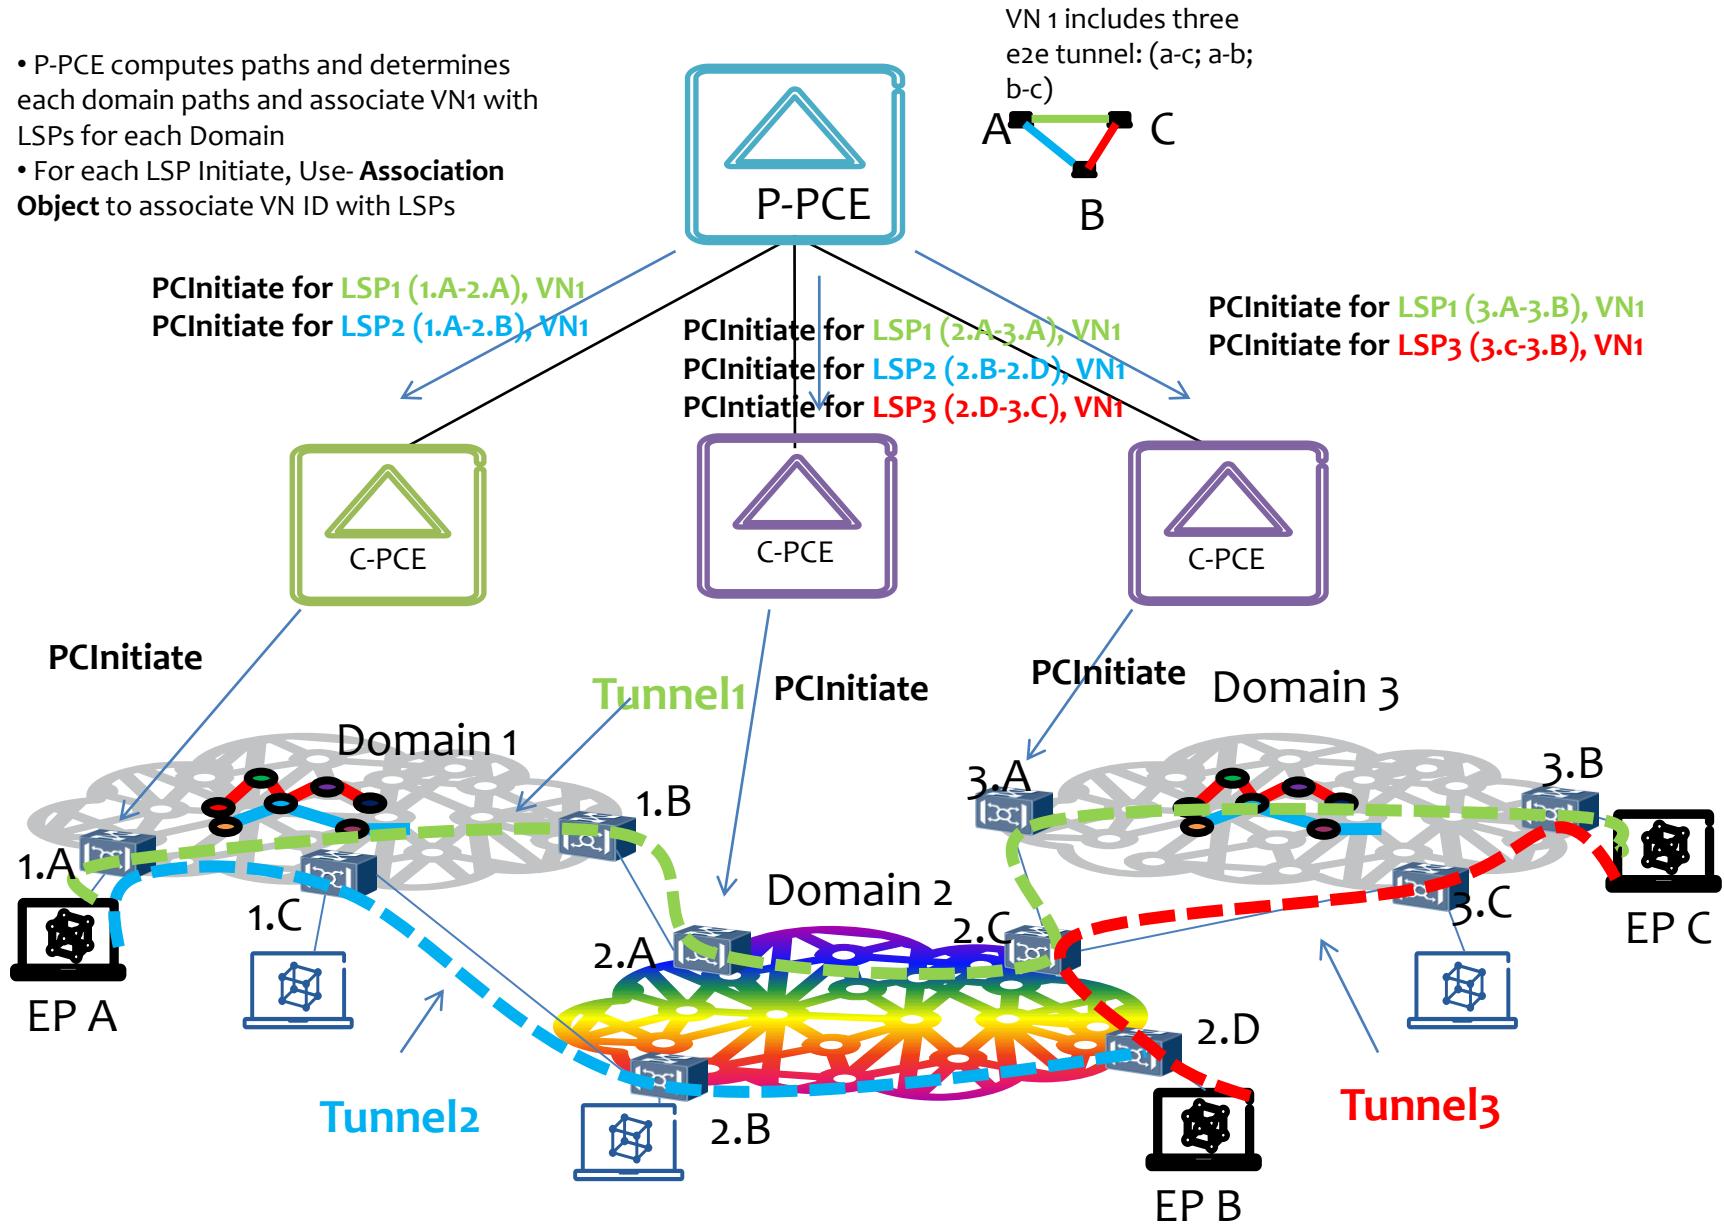

Daniele Ceccarelli (Ericsson)

Background/Motivation

- As per [I-D.ietf-pce-association-group], LSPs are associated with other LSPs with which they interact by adding them to a common association group.
- In this draft, this grouping is used to define associations between a set of LSPs and a virtual network for a PCE to identify LSP under a VN.

Applicability: H-PCE and ACTN

- P-PCE computes paths and determines each domain paths and associate VN1 with LSPs for each Domain
- For each LSP Initiate, Use- Association Object to associate VN ID with LSPs

PCEP VN Association Group (VNAG)

- Thus this document defines one new association type called "VN Association Type" of value TBD1.
- The scope and handling of VNAG identifier is similar to the generic association identifier defined in [I-D.ietf-pce-association-group].

The VNAG Object formats (IPV4)

0	1	2	3																				
0 1 2 3 4 5 6 7 8 9 0 1 2 3 4 5 6 7 8 9 0 1 2 3 4 5 6 7 8 9 0 1																							
+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+																							
Reserved								Flags								R							
+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+																							
Association type=TBD1								Association ID															
+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+																							
IPv4 Association Source																							
+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+																							
// Optional TLVs //																							
+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+																							

0	1	2	3																				
0 1 2 3 4 5 6 7 8 9 0 1 2 3 4 5 6 7 8 9 0 1 2 3 4 5 6 7 8 9 0 1																							
+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+																							
Type=[TBD2]								Length (variable)															
+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+																							
// Virtual Network Name //																							
+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+-----+																							
The VIRTUAL-NETWORK-TLV formats																							

Summary & Next Step

- An early multi-vendor implementation is in progress.
- Continue to refine the document.
