Eval-criteria-05 (1/2)

Added Stefan Holmer as co-author

Jitter model to be updated to include Google's proposal

Stefan Holmer will be adding this directly

Metrics definitions

Move those in eval-test to eval-criteria?

Video/Audio sequences

Uncompressed sequences

Needs a repo or similar to store them

UDP background traffic

Eval-criteria-05 (2/2)

UDP Background Traffic

How to generate it? MTU size? Packet rate?

$$\text{packet_rate} = \text{target_rate} / \text{mtu_size}$$
$$\text{inter_packet_interval} = 1000 / \text{packet_rate}$$

app-cc-interaction

Stefan Holmer and I discussed this at the last IETF, will submit this before end of April.

Adaptive FEC

Next steps?
