

BFD AUTHENTICATION

DRAFT-IETF-BFD- AUTHENTICATION

Manav Bhatia
Ashesh Mishra
Mahesh Jethanandani
Ankur Saxena

BFD AUTHENTICATION

- Update
 - No change since it became a WG draft
 - Security implication concerns

PROPOSED SOLUTION

- Authenticate state change packets (only)
- Every second send an authenticated packet
 - That may not be a state change packet
 - To prevent a MITM attack

BFD AUTHENTICATION

- Meeting to discuss security implication
 - With Alan Dekok, Randy Bush and Jeff Haas
 - Generally ok with the algorithm
 - Alan suggested non-meticulous sequence number
 - Alan to suggest an algorithm for the same

NEXT STEPS

- Draft has been stable for sometime now
- Could add the option of non-meticulous sequence numbers
- WG LC?
