IETF 96, Berlin, Germany

Comments received and resolved

- Suggestions for more citations
- Clarify whether L2 or L3 hops intended
- Use language more appropriate for IETF specification documents
- Improve figure legends, captions
- Numerous wordsmithing improvements

Idea for new draft

- Suggestion was to describe link quality indicators.

- This is a great idea for a new draft, but does not necessarily fit within the intended range of discussion for the multihop communications draft.
