Parallel NFS (pNFS)
Flexible File Layout
NFSv4 WG
IETF96

Tom Haynes
loghyr@primarydata.com

ffds_stateid

- Not usable for loosely coupled

  - NFSv3 no need

  - NFSv4.x, does not make sense

- Won't work for tightly coupled

  - Is global

Where to go?

- Could modify XDR

  - Existing loosely coupled NFSv3 implementations

- Deprecate the field in the document

  - Explain

  - Allow for a new layout type that fixes the issue
