

Recommendations on filtering of IPv6 packets containing IPv6 Extension Headers (draft-gont-opsec-ipv6-eh-filtering-00)

Fernando Gont
Will Liu
Ron Bonica

IETF 96
Berlin, Germany. July 17-22, 2016

Overview

- This document is an IPv6 version of RFC7126
- Summarizes security and operational implications of:
 - IPv6 Extension Headers
 - IPv6 options
- Provides operational advice on how to filter such IPv6 packets
- It's critical to try to improve the state of affairs wrt the widespread dropping of packets with EHs

Changelog for version 01

- Filled in sections that had missing content
- Minor editorial improvements

Moving forward

- We need at least two volunteers to provide detailed reviews of this document
 - Volunteers?
- Maybe WGLC after addressing the received feedback?
