

Features of the UDP and UDP-Lite Transport Protocols

draft-fairhurst-taps-transport-usage-udp

Gorry and Tom

University of Aberdeen

Changes since -01

- Fixes to address issues noted by WG.
- Completed Multicast section to specify modern APIs.
- Noted comments on API usage for UDP.
- Feedback from various reviewers.

We have running code

- UDP as a first class transport in NEAT
- High level service API:

```
neat_open  
neat_accept  
neat_read  
neat_write
```

<https://github.com/neat-project/neat>

Next Steps

- We are done
- Do we:
 - Merge into draft-ietf-taps-transport-usage?
 - Publish as a separate document?
(moving section 3 into other doc).
