

RFC793bis Status - draft-ietf-tcpm-rfc793bis

- No document update submitted since last IETF meeting
 - currently at -02 revision
- Towards -03 revision, several edits mainly related to RFC 1122 are in the git repository:
 - <https://bitbucket.org/weddy/rfc793bis>
- Cutting and pasting of text is not always leading to a very readable document
 - After submitting -03, it will be helpful to get some working group feedback on this, and I can point out some specific examples for feedback
- Plan to submit -03 revision during IETF week
