IDR
IETF 97, Seoul

John Scudder
Sue Hares
Note taking, Jabber

Please contribute to notes using Etherpad (linked from IETF agenda on datatracker)

- You do not have to be the exclusive note-taker, you can be a contributor
- Especially, verify your name and comments at the mic are captured accurately
Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:

- The IETF plenary session
- The IESG, or any member thereof on behalf of the IESG
- Any IETF mailing list, including the IETF list itself, any working group or design team list, or any other list functioning under IETF auspices
- Any IETF working group or portion thereof
- Any Birds of a Feather (BOF) session
- The IAB or any member thereof on behalf of the IAB
- The RFC Editor or the Internet-Drafts function

All IETF Contributions are subject to the rules of RFC 5378 and RFC 3979 (updated by RFC 4879).

Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice. Please consult RFC 5378 and RFC 3979 for details.

A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.

A participant in any IETF activity acknowledges that written, audio and video records of meetings may be made and may be available to the public.
Document Status

- New RFCs
  - RFC 7947, Internet Exchange BGP Route Server
  - RFC 7964, Solutions for BGP Persistent Route Oscillation
- Completed initial WGLC, one week extension
  - Large Communities, draft-ietf-idr-large-community
- New WG documents
  - BGP Link-State extensions for Segment Routing, draft-gredler-idr-bgp-ls-segment-routing-ext
    - Start WGLC?
Waiting for implementation

- Extended Message support for BGP, draft-ietf-idr-bgp-extended-messages-13
- Route Target Constrained Distribution of Routes with no Route Targets, draft-ietf-idr-rtc-no-rt-05
- Implementation reports through IDR Wiki, https://trac.ietf.org/trac/idr/wiki
  - Or talk to the chairs
Move to “dead”

- Generic Subtype for BGP Four-octet AS specific extended community draft, draft-ietf-idr-as4octet-extcomm-generic-subtype (overtaken by events, large-community)
  - Waiting on IANA to find out how to deprecate associated code points
IDR Wiki

- https://trac.ietf.org/trac/idr/wiki
  - Implementation reports
  - Draft authorship checklist
    - Including a whole section on how not to squat on code points, ahem
  - Meeting presentation checklist
  - RFC commentary
    - Things not clear in RFCs that aren’t errata and don’t rise to the level of an update or bis RFC

- Please consult, update, use the your wiki
IDR Wiki

- Needed work
  - BGP document set and relationships
  - BGP architectural overview
- Volunteers please
Agenda

- Published online, no eyechart here, sorry
- 2:30 + :10 allocated out of 2:30 meeting time
  - Please keep comments focused
  - We may ask long followup to move to list
