

LIME WG

IETF 96

Ron Bonica

Carlos Pignataro

# Our Charter

- Found at <https://datatracker.ietf.org/wg/lime/charter/>
- Deliverables
  - Yang Data Models
  - Architecture document
  - Applicability document
- Yang models in progress
  - Draft-ietf-lime-yang-connectionless-oam-methods
  - Draft-ietf-lime-yang-connectionless-oam
  - Draft-ietf-lime-yang-oam-model
- Other documents have been subsumed

# Our Status

- Connection oriented documents are nearly ready for WG last call (?)
- Connectionless document is not far behind (?)
- It's later than you think
  - WG was chartered two years ago
  - Yang models were due in September 2015
- The window of opportunity is passing
- Some WGs are building their own YANG models, independent of the LIME framework

# Our Goals

- Send the connection oriented drafts to the IESG by IETF 98
- Send the connectionless draft draft the IESG by IETF 99
- Shutdown by IETF 99
  - Regardless of progress

Work Hard:  
Be Successful
