High level guidance
for the meeting policy of the IETF

draft-krishnan-ietf-meeting-policy-01

Policy vs. Process

- The original goal of having the two documents was that

    - one of the documents will specify the high level meeting policy (aka 1-1-1-*)

    - the other document will detail the process for venue selection

- The reason for doing so was that the high level policy was expected to be relatively stable while the actual selection criteria were expected to evolve more quickly

Next Steps/Questions

- Most (all?) of the discussion on the mailing list has been focused on the venue selection document
  - Not sure if it is a sign of the policy document being ready or a lack of interest
- Do we need a separate policy document?
  - Or should we merge the contents into one document
