RMCAT DT status update

Zaheduzzaman Sarker
Representing DT
Since IETF96

● DT met twice
● Addressed the comments from IETF96
● Worked on FIXMEs on -00 version of the draft-dt-rmcat-feedback-message
● Discussed and analyzed low bitrate use cases
● Updated packet format and analyzed the possible RTCP bandwidth required
● Worked on (optimization) alternatives
  ○ Optional block for ECN vector
  ○ Compressed loss information
  ○ Not included in -01 version of the draft due to lack of time to discuss.
● Should complete the task by IETF98
