IETF 97, November 15th

# Housekeeping

- Finalizing Information Model Terms
  - Information Element
  - Metadata
  - Statement
  - Content-Element
  - Content-Metadata
  - Subject
  - Attribute
  - SACM Content (this is still subject to changes of architecture)

# General Improvement

- Labels
  - SACM Component Label
  - Target Endpoint Label
- Guidance
  - Imperative Guidance
  - Declarative Guidance
- Collector
  - Refactored in regard to distributed components of a Collector
  - Definition of distribution between different controllers/brokers is still to be refined

# Next Steps: Architectural Building Blocks

- Revisiting definitions of Functions
  - Implicates stabilizing definition of Interfaces & Interaction Model(s)
- Revisiting definitions of Roles
  - Implicates stabilizing Components
- Settling the “composability” of SACM components

# Questions?

- While question pending
  - Please state question
- Until no question pending
  - Thank you!
