IETF Website Revamp Project

2017-03-27
Some questions for WG Chairs

• How do you use the www.ietf.org site? (How often?)

• What would you like potential WG contributors to find at www.ietf.org?

• What would be useful for others (managers, etc.) to find at www.ietf.org?
Project formation

• Scope of work developed with input from community, including functional and technical requirements, and key audiences

• IAOC Technology Management Committee (TMC) recommended vendor (Torchbox selected)

• Community Review Committee provides input and guidance

• Research (including interviews with key audiences) informed the design
Key audiences

Active IETF Participants
“A Chair needs to find out what tools are available without going to a class, and how to manage the document process.”

New or Potential IETF Participants
“This is very interesting, relevant work but when I follow a link to their site I can’t understand the relevance of things.”

Non-participants looking to find out more about the IETF
“They seem to expect people to come to them, instead of engaging the communities they’re relevant to.”
Audience research findings

Overwhelmingly, respondents felt that the current website serves the needs of a very limited subset of users, that the focus on the ‘real work’ of the IETF should remain and that significant improvements should be made to ensure the IETF website sufficiently serves the wider communities looking to it for (but currently failing to find) guidance.
Making the Internet work better

Internet standards are built on rough consensus and running code. Learn how IETF Hackathons bridge the gap between standards and implementation. Learn more about IETF Hackathons

Understanding our documents

INTERNET-DRAFTS
REQUEST FOR COMMENTS (RFC)
WORKING GROUPS

Internet-Drafts are working documents of the IETF, its areas, and its working groups. During the development of a specification, draft versions of the document are made available for informal review and comment by placing them in the IETF’s Internet-Drafts repository.

After the first decade: IASA Retrospective
The IETF Administrative Support Activity was formally established and undertaken as a project of the Internet Society in 2006. In the following 10 years, the IETF has grown and changed...

Upcoming events

IETF 98 Chicago
IETF 98 will take place in Chicago, Illinois.

IETF 93 Summary
Our meeting in Prague ended last Friday, and I wanted to thank everyone who participated! I hope you all had an opportunity to return home and rest after the trip.

What's new?

IETF-93 Summary
IETF 98 will take place in Chicago, Illinois.

Email Archives
A new mail archive tool realizing the requirements developed in RFC 6778 is now in use:

- Search all IETF email archives.

If you choose to log in, use your datatracker credentials.

Recent Meeting: IETF 97, Seoul, South Korea

Host and Sponsor
Short walk through
Some questions for WG Chairs

• How do you use the www.ietf.org site? (How often?)

• What would you like potential WG contributors to find at www.ietf.org?

• What would be useful for others (managers, etc.) to find at www.ietf.org?
What now? What next?

• Review design and initial content build
• Adjust based on initial feedback
• Revise content and fix bugs (several rounds)
• Move to production once satisfied
