

OAuth 2.0 Token Exchange

draft-ietf-oauth-token-exchange

Mike Jones
IETF 98, Chicago
March 2017

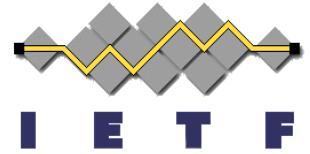

Document Status

- Current draft is [draft-ietf-oauth-token-exchange-07](#)
- Only minor changes since Seoul
 - Described the relationship between resource, audience, and scope
 - Added “invalid_target” error
 - Acknowledged more reviewers
- In Seoul, we asked for feedback from implementers
 - Salesforce has implemented both subject_token and actor_token functionality
 - Microsoft has implemented subject_token functionality
 - What have others implemented?

Next Steps

- Discuss recent feedback from Torsten Lodderstedt
 - Asked about rationale for multiple audiences, etc.
- Then time for WGLC?
