

# draft-ietf-tls-dnssec-chain-extension update

- ▶ Currently at -03 revision
- ▶ Updates since Seoul include
  - ▶ added TLS 1.3 support
  - ▶ added section on raw public keys
  - ▶ softened language on record order
  - ▶ updated discussion of UKS attack
  - ▶ edits for language and consistency
- ▶ Fairly well-cooked with respect to TLS considerations

# TBD before wglc

- ▶ Need to add pseudocode and test vectors
- ▶ Need to add edits based on Viktor's most recent comments
- ▶ We know there may be additional DNS-related issues lurking in the background, need feedback from dnsop, dane, and dpriv working groups
