

Current Status of FLAC Standardization Work

Andrew Weaver

Process started in May 2017

Work to date:

- Create semantically identical translation of standard in Markdown
- Adapt makefile to create RFC (xml, txt, html)
- Correct minor errors in original document (e.g. typos, broken links)

- Started to clarify encoding type
- Started to modify document to decrease ambiguity (e.g. showing calculations)
- Started rewording for RFC format
- Began to incorporate changes that have come through flac-dev for clarity
