draft-ietf-dots-architecture update

A. Mortensen, N. Teague, F. Andreasen,
T. Reddy, R. Compton, C. Gray

Status

- Two revisions since IETF 98

- Incorporated WG feedback

- Issue tracking on github (no current issues)

- Awaiting additional multihoming discussion

Changes since -03

- PR #15: Emphasize reduced client control in recursive signaling caveats
- PR #16: Define DOTS sessions
- Close issues #14 and #15 respectively

Remaining work

- Incorporate changes resulting from additional use cases and multihoming discussion

- Possible adjustments resulting from implementor feedback

- Authors will meet for comprehensive review ahead of anticipated WGLC

Thank you
