draft-ietf-dots-requirements update

A. Mortensen, R. Moskowitz, T. Reddy

Changes since -05

- Good WG feedback following IETF 98, interim
- Added github issues for all WG feedback
- Addressed all new issues in -06
- 10 issues closed since interim
- 1 issue remaining

Selected recently closed issues

- #19: Add authorization requirement (SEC-004)
- #20: Clarify replay protection requirements
- #40: Client MUST set mitigation lifetime
- #41: Client MAY incorporate server feedback
- #44: Servers MUST support B/W list management

Remaining open issue

- #16: Overlapping request handling
- Two or more uncoordinated DOTS clients may report same attack
- Server should handle gracefully
- Conflicting filters more likely
- Pull request forthcoming

Remaining work

- Any new issues?
- Ready for WGLC after closing last issue?

Thank you
