IETF 99 – IPPM; July 19<sup>th</sup>, 2017

# Key updates between -03 (reviewed in Chicago) and -07 version

- Added a section on scope of in-situ OAM, including
  - IOAM deployment domain
  - IOAM control points
  - Traffic sets IOAM is applied to
  - Encapsulation for IOAM
  - Layering aspects
  - Combination with other OAM mechanisms
- Data fields updates
  - New data field to create a checksum-neutral packet
- Document type change (experimental to standards track)
- A lot of editorial updates (special thanks to Joe Clarke and Al Morton for detailed reviews)

# Status and next steps

- WG adoption of IOAM work
  - Positive outcome of WG adoption call on the list
  - draft-brockners-inband-oam-data-07 as starting point
