IETF-99 July 2017, Prague

From -01 to -03

- Welcome Luay Jalil (Verizon)
- Switch from request for port allocation to port re-allocation

UDP Port Re-allocation

- IANA Service Name and Transport Protocol Port Number Registry had assigned TCP port 862 for twamp-control service TWAMP-Control protocol per RFC 5357

- but it had assigned UDP port 862 for TWAMP-Control as well

- Use this document to re-assign UDP port 862 for TWAMP Test Session-Reflector Receiver port as twamp-test service

Next steps

- Your comments, suggestions, questions always welcome and greatly appreciated
- WG adoption
