Next steps for lpwan

Ana Minaburo

IETF 99 - Prague
Mailing List discussion

• ICMP Compression (draft from Diego)
• SCHC over specific LPWAN technologies
  – Profile Technologies.
  – Develop the different document for each technology in order to define the different parameters.
• Security, all the security solution for the LPWAN
• Rules-ID’s management – Use to identify some specific cases:
  – Fragmentation
  – Format Values
  – Rule-IDs dedicated for some specific cases as CBOR structure representation, fragmentation, etc
  – The way to use the Rule-Id and their configuration
• YANG data modeling for SCHC
