Status of ROLIE Drafts

Stephen Banghart

Core ROLIE Draft, -07 changes

- **Front Matter Rework**
  - *Front matter reorganized and made more concise.*
- **/.well-known/ registration for Service Document and Category Document**
  - *In order to follow IETF guidance on URL templates, Service and Category documents are now found at {host}/.well-known/*
- **Additional IANA registrations**
  - *Local category and property namespace, additional property registrations.*
- **Added Privacy Considerations**
- **Addressed editorial changes from WGLC**

Core ROLIE Draft, -08 changes

- **Post-WGLC comments integrated**
  - *Reworked "usage of app:collection" and "usage of atom:feed"*
  - *Fixed duplicate requirement text in Security Considerations*
  - *TLS requirement clarifications*
  - *Section 5.5 (RID) requirement clarifications*
- **Additional IANA Registrations**
  - *property:content-id, property:content-published-date, property:content-updated-date*
- **Assorted editorial changes**

Next Steps

- A number of minor (non-normative) changes in -08. WG thoughts on moving forward?

- Any other review/questions/comments?

ROLIE CSIRT Extension

- -02 update with minor edits to be posted soon.

- Working Group Adoption?

- Still looking for recommendations for property/category exposure and necessary link relationships.
