

NMDA for NETCONF

draft-dsdt-nmda-netconf-00.txt

Phil Shafer
IETF99 July 2017

Purpose

- NETCONF needs to support NMDA
 - Think <get-config> for arbitrary datastores

New Operations

- <get-data>
 - <get-config> with <target> leaf
- <edit-data>
 - <edit-config> with <target> leaf

Origin Attribute

- @origin gets NMDA "origin"
- Hierarchical persistence

Augmented Operations

- <lock>, <unlock>, and <validate>
 - New <datastore> leaf

Thanks.....
