Status of TACACS draft

- Authors decided not to discuss the document in Prague as they were not ready with the updated revision by the cutoff.
- Message from authors is that they will be able to post a new revision before the current one expires in August
- WG chairs are getting slightly worried about the lack of visibility of the work on addressing the review comments. From the side it may appear that the work is abandoned.
- At this time WG chairs do not intend to step in and will let the authors to continue doing their editing work.
- Checkpoint one month before Singapore cutoff date for having a new revision that addresses the comments.
