

RFC 3101 NSSA ECMP

- Current text doesn't allow ECMP though multiple ASBRs.
- Propose to relax last criteria via errata since at least 2 vendors have done so.

(e) If the current LSA is functionally the same as an installed LSA (i.e., same destination, cost and non-zero forwarding address) then apply the following priorities in deciding which LSA is preferred:

1. A Type-7 LSA with the P-bit set.
2. A Type-5 LSA.

OLD:

3. The LSA with the higher router ID

NEW:

3. Optionally, the LSA with the higher router ID
