BGP community based PCE in native IP network

Lu Huang, China Mobile
Aijun Wang, China Telecom
Problem to be addressed

- This draft is for the same scenario and requirement as the draft [I-D.wang-teas-pce-native-ip]
  - Find a way to support traffic steering in a native-ip network
Proposed solution

- Use BGP community to differentiate traffics with various priority
- Assign a specific next-hop address for a specific BGP community
- Through PCE, set explicit path hop by hop for the specific next-hop address to steer the related traffic as needed
Next Steps

• Welcome your comments and suggestions
• Request for WG adoption
Thanks
