BEHAVE interim meeting

2012-06-21

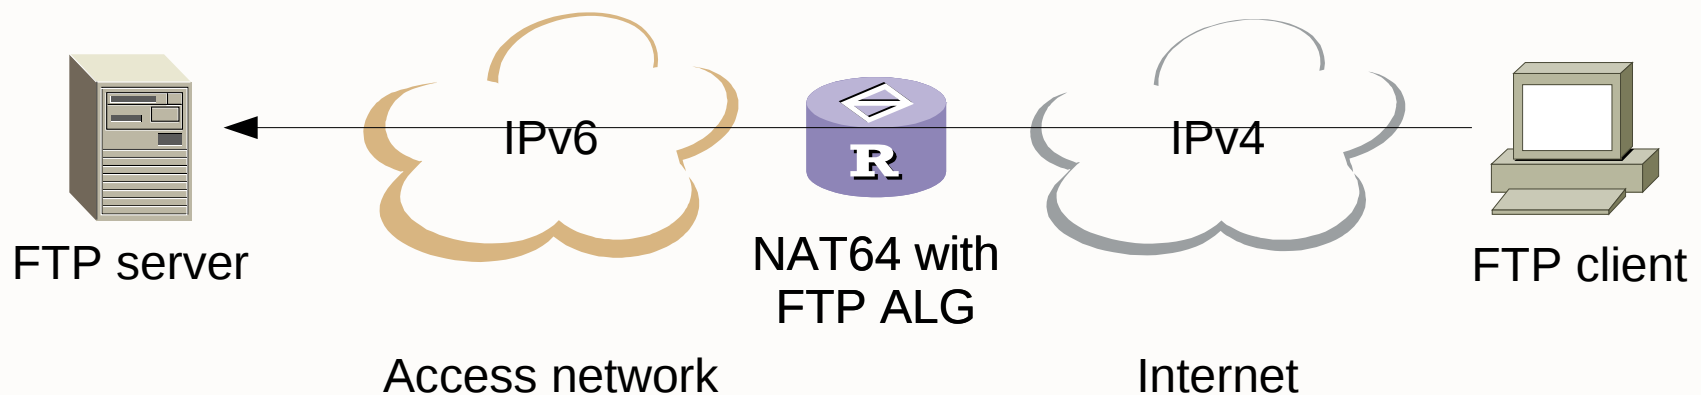

# Introduction

- BEHAVE made RFC 6384  
“An FTP Application Layer Gateway (ALG) for IPv6-to-IPv4 Translation”
- Use case considered:

# New use case

- Subscriber runs FTP server.
- Uses UPnP/PCP/whatever to open a port on the NAT64.

# Our draft

- draft-tsou-behave-ftp46-00
- Specifies ALG behavior for the IPv4-to-IPv6 direction.
- Updates RFC 6384.
- Seems straightforward (to us, at least).

# Next steps

- Please read and give us feedback!
- WG draft? AD sponsored? Individual?
