

STOX Virtual Interim

December 17, 2013

Chairs:

Markus Isomäki

Yana Stamcheva

Note well

Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:

- the IETF plenary session,
- any IETF working group or portion thereof,
- the IESG or any member thereof on behalf of the IESG,
- the IAB or any member thereof on behalf of the IAB,
- any IETF mailing list, including the IETF list itself, any working group or design team list, or any other list functioning under IETF auspices,
- the RFC Editor or the Internet-Drafts function

All IETF Contributions are subject to the rules of RFC 5378 and RFC 3979 (updated by RFC 4879). Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice. Please consult RFC 5378 and RFC 3979 for details.

A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.

A participant in any IETF activity acknowledges that written, audio and video records of meetings may be made and may be available to the public.

Agenda

1. Opening (chairs, 5 min.)
 - Note takers, agenda bash
2. STOX WG status (chairs, 5 min.)
 - Where we are with core, presence, im, chat and groupchat
3. Media signaling walkthrough (Co-authors, 20 min.)
 - Explain how it is supposed to work
 - Clarifying questions allowed
4. Media signaling open issues and discussion (Co-authors, max. 50 min.)
 - Resolve issues if possible, Assign actions, Plan next revisions
5. Summary and closing (chairs)

Overall time max. 90 minutes.

Status update (1/2)

- stox-core and stox-presence
 - WG Last Call Oct 8-22
 - A few comments, mainly "ready to go with small nits", updated versions
 - IETF Last Call Nov 27 – Dec 11
 - Comments from Robert Sparks, Dave Cridland, Dan Romascanu, Dave Crocker
 - stox-core updated (-08), stox-presence to be updated
- stox-im and stox-chat
 - WG Last Call Nov 25 – Dec 9
 - Comments only from two people, updated versions
 - A few "ready to go" responses would be good before passing them forward

Status Update (2/2)

- stox-groupchat
 - Co-authors discussing “generating RFC4575 participants list out of a MUC” on the list, updated version based on their conclusion
 - No other known open issues?
 - WG Last Call after the previous four drafts are safely through?
- stox-media
 - An updated version (-02) submitted Dec 12
 - Topic of today’s meeting!
 - Conclude next steps and target timeline today

Summary and Action Points

- -im, -chat
 - Voluntary reviewers:
- -groupchat
 - Open issues:
 - Voluntary reviewers:
- -media
 - Open issues:
 - Voluntary reviewers:

Reminder: Principles from IETF 87

- In the current set of documents, only include features or methods that
 - Have stable specifications in either IETF or XSF. In IETF this means in practice a published RFC.
 - Have some amount of real implementation and deployment.
- New functionality introduced through separate extension documents (not on current charter)
 - Relevant especially to “media signaling” topic where new work is currently in progress in both IETF and XSF (trickle-ICE, bundle, unified-plan)
